

Area	Topics you should prepare
1. Number System	Number types, divisibility, factors & multiples, HCF & LCM, remainders, unit digit, simplification
2. Arithmetic	Percentages, ratio & proportion, averages, profit & loss, simple & compound interest, time & work, time-speed-distance, mixtures/alligation, ages, partnerships
3. Elementary Statistics	Mean, median, mode, basic statistical calculations
4. Data Interpretation	Tables, bar graphs, line graphs, pie charts, caselet DI, comparison/calculation-based DI

Since you're targeting **TCS Prime 2027**, I would prepare Numerical Ability in this order:

Priority 1 — Arithmetic

1. Percentages
2. Ratio & Proportion
3. Averages
4. Profit & Loss
5. Time & Work
6. Time, Speed & Distance
7. Simple & Compound Interest
8. Mixtures & Alligation
9. Ages
10. Partnership

Priority 2 — Number System

11. HCF & LCM
12. Divisibility
13. Remainders
14. Number properties
15. Unit digit / last digit
16. Simplification

Priority 3 — Data Interpretation

17. Tables
18. Bar graphs
19. Line graphs

- 20. Pie charts
- 21. Caselet DI

Priority 4 — Statistics

- 22. Mean
 - 23. Median
 - 24. Mode
-

Official area	What you should study
1. Identifying Word & Numeric Patterns	Number series, letter series, alphanumeric series, coding-decoding, analogies, odd one out
2. Problem Solving	Puzzles, arrangements, blood relations, directions, ranking/order, scheduling
3. Figural & Factual Analysis	Figure-based patterns, figure analogy, classification, factual/logical analysis
4. Decision Making	Situational problems, selecting the best option, logical decision-making
5. Propositional Reasoning	Statements, conclusions, assumptions, logical relationships, syllogisms
6. Visual/Spatial Reasoning	Figure rotation, mirror/water images, paper folding/cutting, cubes/dice, spatial relationships

For your TCS Prime 2027 preparation

I'd prioritize them like this:

High priority

1. Number series
2. Letter/alphanumeric series
3. Coding-decoding
4. Analogy & classification
5. Blood relations
6. Direction sense
7. Ranking/order
8. Seating arrangements
9. Logical puzzles
10. Syllogisms
11. Statements & conclusions

12. Data/logic-based decision making

● Medium priority

- 13. Figure analogy
- 14. Figure classification
- 15. Figure series
- 16. Cubes & dice
- 17. Mirror/water images
- 18. Paper folding/cutting
- 19. Spatial visualization

● Don't over-invest initially

- Very complicated puzzle sets
 - Extremely advanced non-verbal reasoning
 - Rare/complicated mathematical reasoning tricks
-
- For your **TCS Prime 2027 preparation**, however, this is the practical syllabus I recommend:

Area	Topics to prepare	Priority
Advanced Arithmetic	Percentages, ratios, averages, profit & loss, mixtures, time & work, pipes & cisterns, time-speed-distance	🔥 🔥 🔥
Number System	Divisibility, HCF/LCM, remainders, cyclicity, number properties	🔥 🔥
Algebra	Equations, inequalities, quadratic equations, sequences & series	🔥 🔥
Permutation & Combination	Fundamental counting, arrangements, selections	🔥 🔥 🔥
Probability	Basic probability, conditional probability, counting-based probability	🔥 🔥 🔥
Geometry	Triangles, circles, quadrilaterals, coordinate geometry, mensuration	🔥 🔥
Advanced DI	Tables, graphs, caselets, multi-step calculations	🔥 🔥
Logical reasoning	Complex puzzles, arrangements, grouping, scheduling	🔥 🔥 🔥
Data/logical analysis	Constraints, conditions, deductions, optimization	🔥 🔥 🔥
Advanced series/patterns	Number/letter/alphanumeric patterns	🔥 🔥
Combinational reasoning	Arrangement + conditions + counting	🔥 🔥 🔥

Area	Topics	Priority
Reading Comprehension	Passage comprehension, main idea, inference, tone, vocabulary in context	🔥 🔥 🔥

Area	Topics	Priority
English Grammar	Tenses, subject–verb agreement, articles, prepositions, conjunctions, pronouns	
Sentence Correction	Grammar errors, incorrect usage, sentence improvement	
Fill in the Blanks	Vocabulary, grammar, contextual usage	
Vocabulary	Synonyms, antonyms, word meanings, contextual vocabulary	
Sentence Completion	Choosing the appropriate word/phrase	
Para Jumbles	Rearranging sentences into a logical paragraph	
Error Detection	Identifying grammatical/usage errors	
Cloze Test	Completing passages using context and grammar	
Idioms & Phrases	Common expressions and meanings	

Level	Topics / problem types	Priority
 Easy	Arrays	
	Strings	
	Numbers & mathematics	
	Sorting	
	Searching	
	Frequency/counting	
	Basic hashing	
	Two pointers	
	Basic recursion	
 Medium	Sliding window	
	HashMap/HashSet problems	
	Prefix sum	
	Binary search on answer	

Level	Topics / problem types	Priority
	Stack/Queue	★ ★
	Linked lists	★ ★
	Recursion/backtracking	★ ★
	Greedy	★ ★ ★
	Trees/basic traversal	★ ★
	Dynamic Programming — basic	★ ★ ★
	Graphs — BFS/DFS basics	★ ★

For TCS Prime, your coding target should be

Don't stop at basic LeetCode Easy.

Aim for:

Easy → Easy+ → Medium

For example:

Easy

Find second largest element

Reverse a string

Count frequencies

Remove duplicates

Check palindrome

Find missing number

Two Sum

Medium

Longest substring without repeating characters

Subarray with given sum

Longest consecutive sequence

Merge intervals

Maximum subarray variations

Binary search variations

0/1 Knapsack

Coin Change

BFS/DFS problems

The most important topics for you

Since you're already learning **DSA in Java**, I'd structure your TCS coding preparation like this:

Phase 1

Arrays → Strings → Hashing → Sorting → Searching

Phase 2

Two Pointers → Sliding Window → Prefix Sum → Stack/Queue

Phase 3

Recursion → Greedy → Binary Search → Linked List

Phase 4

Trees → Graphs → Dynamic Programming
